PRO-LIFE

On December 2, 2009, the Obama Administration approved the first use of human embryonic stem cells for experiments by federally funded researchers, using our tax dollars for an unethical destruction of human life at its early stage. Richard Doerflinger of the U.S. Conference of Catholic Bishops told the *New York Times*, (12/3/09) that, "the tragedy of this is multiplied by the fact that no one can think what the problem is that can only be solved by these cells, in light of the amazing progress that has been made with adult stem cell research."
